

PQ Labs G Series

The G Series touch overlays are a quick, easy and highly customisable solution for incorporating multi-touch functionality to standard large format displays.

The G Series overlays utilise LED cell imaging touch technology. Models include the G5, G6, G7 and G4P for video walls.

G5 key features

- 2 to 50 point multi-touch options
- 32" - 98" standard sizes, with custom sizes available on request
- Supplied with Mighty Glass on request; an ultra-smooth, robust glass overlay
- Native touch compatibility via USB HID for Windows, Mac, Android and Linux
- Sample rate of 250 frames per second for reduced latency and smooth operation
- USB powered, no additional power supply required
- Detects pen tip as small as 1.5mm
- Slim frame variant (G5S) available
- Up-to 4K touch fidelity (less than 0.5mm)
- Anti-sunlight (up to 150,000 lux)
- Anti-spill, customisable to IP66

G6 additional features

- 'Q-Force' Pressure sensitivity technology for drawing and handwriting with any passive stylus or finger

G7 additional features

- Tiny bezel, only 3.8mm thickness
- Easy integration, minimal assembly required
- 'Q-Force' Pressure sensitivity technology

G4P additional features

- Custom sized frames available from 100" to 500"
- 6, 12, 32 point multi-touch options
- Customisable for any display solution
- External PSU
